

## **IN THE ABSTRACT**

Please add the Abstract of the Disclosure as set forth on the separate accompanying sheet.

## ABSTRACT OF THE DISCLOSURE

The invention provides an irrigation unit (10) for plants (76) which can either be used alone or in combination with a separate plant container (190) which irrigation unit includes a body (12) which has an upper side (14), a lower side (16), a base (18) on the lower side, an outer wall (20) which extends upwardly from the base and an inner wall (22) which is engaged with and spaced from the outer wall, a cavity (26) formed by the body, a reservoir (28) defined between the inner and outer walls which has an inlet (30) thereto and an outlet (32) therefrom into the cavity, an open ended fluid passage (40) which has a first upper end (42) which terminates in the reservoir and a second lower end (44) which terminates in the cavity, an overflow formation (56) which extends from the body and which is in communication with the cavity and a support platform (58) in the cavity.
